

The Inova WallBed: *The Masterpiece Series*

Unlimited Variations in the Front Panel Design...

Crown Cap, Canopy, and Lighting Options

Top Views

Overhanging Canopy

Halogen downlights are mounted in front of the closed bed panel.

Rectangular Crown Cap

Lights are mounted above the head of the bed for use when the bed is down.

The Masterpiece Series WallBed is built in hardwood Maple veneer (standard) or any other species of veneer over particle board (for excellent dimensional stability) with solid wood applied moldings and detailing.

The mattress can be a premium 13" thick and it is supported by a European curved Beechwood slat system. The combination of a thick mattress with the box-spring-like support of the slats gives an uncompromised, unmatched level of comfort for a Murphy-type bed.

Installation requires only a simple attachment to the wall at the top of the cabinet; no drilling into the floor.
